How We Do

REQUIREMENT GATHERING

Discuss and document the client's dynamic requirements and also listing the constraints (if any) to define the scope of work

DESIGN & AGILE DEVELOPMENT

Following the agile development model to define the sprints, design & develop the solutions followed by regular presentation to client

QA VALIDATION & REVIEW

Perform thorough quality check and feature validation to delivery high quality software

DEPLOYMENT & SUPPORT

Deploy the solution in client's environment and provide support as per the contract for seamless delivery

Our Engagement Models

TIME & MATERIAL (T&M)

FIXED COST

STAFF AUGMENTATION

CUSTOMIZED

Why US

Customer Focused
Always remain custom focused while providing best solutions

1

Quality & Innovation Driven
We design innovative and creative product and services that are aligned with customer's requirements with best-in-class quality

2

Trust & Commitment
We believe trust is foundation of any relationship in whatever we do

6

Attention to Details
We closely analyze the client requirements and take care of even small details to deliver the best

3

Process driven
Follow agile process in every project to achieve excellence. We can jump-in at any phase of product life cycle to provide end-to-end support

7

Great team & Resources
We nurture and encourage our employees so that they can create value for our customers with greater engagement & interactiveness

4

Latest technologies
Use latest tech to provide best available solution to our customers

8

Compliance & Industry Standards
Our digital solutions are comprehensive, completely secure, compliant with international standards and regulations (for e.g. HIPAA).

5

Speed of Execution
We vouch to deliver 8-10 weeks MVP with our agile process and commitment to customers timeline

9

VectoScalar
9 Reasons why clients love to work with us

@VectoScalar, we are committed to the success of our Clients. Here are some of these success stories..

Client Testimonials & Success Stories

"**VectoScalar has worked with Kickdrum for nearly a decade completing 50+ projects** in that time. The scope of the projects completed spans many industries such as Automotive, Healthcare, and Travel and Entertainment. We have worked together on all size customers from new startups to mature Fortune 100 companies.

The **VectoScalar team does a great job** in all facets of software development. They help up front with architecture and project estimation when trying to sell new projects to our customers. Their team members work very effectively either as a wholly outsourced team or when integrated with our developers.

Technically they have great depth with backend, frontend, and mobile development. **They understand and leverage the cloud, specifically AWS** and Azure. I would recommend the VectoScalar team for short-term, high touch emergencies, medium-term, high complexity projects as well as long-term, support and maintenance-like arrangements. "

Saurabh Vashishtha
Founder SimSim (Acquired by Google)

Google simsim

VectoScalar was our first technology partner when we started simsim. It has been a pleasure working with them, for more than 2.5 years, on our projects including both web and mobile applications development.

Nikhil has brought together a great set of people who are both very talented and extremely dedicated. They worked well with our scrum teams and helped us deliver consistent results.

They have always been helpful and accommodating to our schedules and deadlines. I highly recommend VectoScalar for your next software development engagement.

Gaurav Kalra
CTO SimSim (Acquired by Google)

Google simsim

Having worked closely with Vectoscalar for past 6+ years, 2.5 years @simsim and 3.5 years @kickdrum, I can fully vouch on their capability to understand, design, build & deliver end-end solution in a timely manner with highest level of quality. One thing thats stands out is level of care & dedication that their team provides, right from leadership to individual developers.

Their experience on carving out MVP & expertise on AWS is commendable.

Nilakantaa
Co-founder and CTO

We are pleased to be associated with you in this journey, may you scale greater heights in the years to come. Congratulations on the magnificent 10th anniversary !!

Neha Mittal
Director

VectoScalar team members proved to be extremely flexible and responsive. They stayed in daily contact with us, which allowed us to adjust the scope of works promptly and implement new requirements on the fly.
Additionally, the team delivered demos regularly so that we could be sure that the our system being developed aligned with our business needs.

Sanjeev
Founder, Beam Melody Ltd

To the entire team of VectoScalar,

Firstly, BIG BIG Congratulations for touching this milestone. Many more such wonderful years on the way. Honestly, I am privileged to be part of Vecto team family.., and for sure you can expect short video from me conveying

Best wishes & Good luck!!

Tarun Gupta
Founder

We have been working with VectoScalar for many years now & for various web/mobile projects. VectoScalar team has been extremely responsive and professional, they're an amazing extension of our team. If you are considering an overseas partner for a software development project, I would highly recommend Nikhil and his team.

Gaurav Sharma
Co-Founder

VectoScalar has been our trustworthy tech partners, they have highly skilled and experienced team members. We've relied on them exclusively since long time and look forward to continuing that relationship. The senior management at VectoScalar has always provided their great support & advice for better solutions. Also, they helped us to adhere our deadlines with their quality & timely deliverables.

Tanuj Shah
CEO

U USERFACET

Userfacet collaborated with Vectoscalar on one of the projects. The project was technically challenging, feature implementation, the benchmarks towards performance, and match to design were set high.

Vectoscalar did an outstanding job and delivered. Special mention about the technical leadership at Vectoscalar, who is always available to understand the requirements and detail it out to their team. We look forward to continuing to collaborate with them.

Simran Khara
Founder

🌸 juggernaut

At Juggernaut, we partnered with Vectoscalar for some of our critical technology projects. They led the work on several high impact projects including building a proprietary Digital Rights Management system for e-books and creating a platform as a service for e-books for multiple partners including Airtel Books.

The team is very mature, the senior folks are hands on and they have a very collaborative approach to working with partners. The developers and product talent is top notch, extremely hard to come by when working with outsourced teams. They're also very open minded and agile to change things around if the project/business requires. Would recommend Vectoscalar very highly!

Sriram Krishnamoorthy
Founder

BUY STARS

VectoScalar were tech partners to BuyStars and helped build and scale up the first systems at BuyStars. The team at VS is extremely competent, showed great ownership and were able to deliver in timelines which were extremely challenging.

The team was stellar, especially the senior folks who had a deep understanding of not just tech, but also the business. They continue to function as an extension to the BuyStars tech team and we would not hesitate to recommend them to other early stage startups.

Congratulations to the VectoScalar team on turning 10! The team at vectoscalar have shown great ownership, and the launch on time for ipl for us was a great business outcome. Great to have the team as partners on our journey.
